REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicant recites a trolley wheel assembly comprised of a hub and a wheel portion rotatably positioned around the hub and a sliding member positioned between the wheel portion and the hub portion where the sliding member defines mating surfaces for mating with corresponding surfaces on the hub and the wheel. The mating surface of the sliding member defines a radial projection circumferentially around the sliding member, the radial projection is positioned inward of the ends of the wheel portion and the hub portion, the mating surfaces of the wheel and the hub encompass the radial projection of the sliding member and the radial projection is slidably mated with the surfaces of the wheel and the hub to facilitate rotation of the wheel about the hub. The device is further comprised of insert portions on the wheel and the hub, which define the mating surfaces of the wheel and the hub with the sliding member.

The prior art made of reference, taken singularly or in combination, does not adequately disclose the features recited in the instant claims. Specifically, the prior art does not disclose the specific arrangement of a sliding member and insert portions between the wheel and the hub.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
